## DETAILED ACTION

### *Reasons for Allowance*

1. Claims 30-32, 35-45, 47-55, 57-67 and 69-76 are allowed.
2. The following is an examiner's statement of reasons for allowance. Claims 30-32, 35-45, 47-55, 57-67 and 69-76 are considered allowable since when reading the claims in light of the specifications, the prior fails to teach or suggest the combination of limitations specified in the independent claim.

Specifically, applicant's claimed invention is deemed allowable over the prior art, as the prior art fails to teach or suggest comparing the measured electrical signals to a model that estimates said electrical signals as a function of the first electrical parameter, the second electrical parameter and the spatial coordinate; wherein the assigned value for the first parameter is insensitive to the second electrical parameter; and wherein the first electrical parameter comprises a resistivity and that the second electrical parameter comprises a dielectric constant as interrelated with the other limitations of the claims. Furthermore, it should be noted that the term "insensitive" is being interpreted to mean "independent" as known in mathematics with respect to equations.

All independent claims describe similar subject matter and are allowable for the same reason.

*Conclusion*

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
